## **NAVIGATION BAR**

A. List of Links

- Home
- News
- Contact
- About

Note: We use href="#" for test links. In a real web site this would be URLs.

```
Dalam contoh ini, saya membuat bilah navigasi dari daftar
<a href="#home">Home</a>
                                      HTML standar. Bilah navigasi pada dasarnya adalah daftar
<a href="#news">News</a>
<a href="#contact">Contact</a>
                                      tautan, jadi disini saya menggunakan elemen  dan 
<a href="#about">About</a>
```

C. Floating List Items

Note: If a !DOCTYPE is not specified, floating items can produce unexpected results.

A background color is added to the links to show the link area. The whole link area is clickable, not just the text.

Note: overflow:hidden is added to the ul element to prevent li elements from going outside of the list.

```
ul {
  list-style-type: none;
  margin: 0;
  padding: 0;
  overflow: hidden;}
li {
  float: left;}
li a {
  display: block;
  padding: 8px;
  background-color: #dddddd;}
```

Cara lain untuk membuat bilah navigasi horizontal adalah dengan mengapung elemen , dan menentukan tata letak untuk tautan navigai

Width: 60px; elemen block mengambil lebar penuh

yang tersedia secra default.

## D. Sticky Navbar

## Scroll Down

Scroll down to see the sticky effect.

## Sticky Navigation Bar Example

The navbar will stick to the top when you reach its scroll position

Note: Internet Explorer, Edge 15 and earlier versions do not support sticky positioning. Safari requires a -webkit- prefix.

Some text to enable scrolling.. Lorem ipsum dolor sit amet, illum definitiones no quo, maluisset concludaturque et eum, altera fabulas ut quo. Atqui causae gloriatur ius te, id agam omnis evertitur eum. Affert laboramus repudiandae nec et. Inciderint efficiantur his ad. Eum no molestiae voluptatibus.

Atqui causae gloriatur ius te, id agam omnis evertitur eum. Affert laboramus repudiandae nec et. Inciderint efficiantur his ad. Eum no molestiae voluptatibus.

```
body {
  font-size: 28px;
ul {
  list-style-type: none;
  margin: 0;
  padding: 0;
  overflow: hidden;
  background-color: #333;
  position: -webkit-sticky; /* Safari */
  position: sticky;
  top: 0;
}
li {
  float: left;
li a {
  display: block;
  color: white;
  text-align: center;
  padding: 14px 16px;
  text-decoration: none;
}
li a:hover {
  background-color: #111;
.active {
  background-color: #4CAF50;
```

Gunakan position : sticky; untuk untuk membuat sticky navbar.

Elemen yang melekat antara relative dan tetap, tergantung pada posisi gulir. Diposisikan relative sampai posisi offset yang diberikan terpenuhi di viewport – kemudian "tongkat" di tempat <seperti posisi: tetap)
